# How to Adjust Accelerator Options

Last Modified on 08/09/2023 6:16 pm EDT

### **How to Adjust Accelerator Options**

URC Accelerator 3 & TC Flex 2 software provide countless options to configure and optimize settings to achieve performance and flexibility for almost any application.

This article details the steps required to change or adjust the default **Accelerator Options** on your laptop or PC accelerator software installation. *Note: This articles details a Windows 10 OS installation* 

### Accessing the Accelerator Options

From the Accelerator program **File** menu, select **Accelerator Options** as shown below:

### **Accelerator Options Main Screen:**

After selecting Accelerator Options as shown above, the **Accelerator Options** main screen will open showing the available adjustable options.

## Programming Mode:

**Programming Mode** determines the level of Total Control Accelerator 3 program that will run based upon the dealer certification level.

The options are Expressway or Total Control Experience. Select the appropriate radio button. If changes are made, they will take effect after restarting the program.

### My Database:

This option will allow you to change the default location of the Custom Driver Folder in the Accelerator program. Make sure to change the entire file path as it may be longer than displayed in the white box.

**Pro Tip:** This option can be used to share a Custom Driver Folder in an organization using Dropbox or other online file sharing program.

### Universal Parse Data Window:

This option will allow you to change the option for showing for showing the Universal Parse Data in the device properties area.

Universal Parse Data is the information used for delivering two-way volume feedback for 3rd party AVR's. Only specified RS-232 and IP AVR's have the ability to provide feedback.

• Warning: Modifying any of the information incorrectly within the Universal Parse Data section can break the volume feedback functionality and possibly control of the AVR. Modifying this should only be used by expert programmers, or if directed by URC tech support.
