

Error Message On Interface "Room Is Off"

Last Modified on 07/21/2025 9:13 am EDT

"Room Is Off" Error

Symptom:

When a user receives an error message on any interface that reads **"Room is Off."**

Solution:

- 1- Modify your **punch-through** manually.
- 2- **Re-accelerate** with the **erase** option in **Step 12**

Explanation:

This message appears when a punch through is set incorrectly. This occurs if an installer assigns inputs and outputs in step 7, or step 8, accelerates, and then goes back and changes these settings (example: Living Room is changed from Zone 1 to Zone 2 and accelerates with the preserve option). When accelerating with the preserve option the software will not modify the volume punch-through to the new zone it preserves the last zone volume setting.
