Error Message On Interface "Room Is Off"

"Room Is Off" Error

Symptom:

When a user receives an error message on any interface that reads '**Room is Off**."

Solution:

1- Modify your **punchthroughs** manually.

2- Re-accelerate with the **erase** option in **Step 12**

Explanation:

This message appears when a punchthough is set incorrectly. This occurs if an installer assigns inputs and outputs in step 7, or step 8, accelerates, and then goes back and changes these settings (example: living room is changed from Zone 1 to Zone 2 and accelerates with the preserve option). When accelerating with the preserve option the software will not modify the volume punchthrough to the new zone it "preserves the last zone volume setting.
