

# Rapid Start/Burst Mode: Vivido & Cooper Aspire Z-Wave Lighting Devices

Last Modified on 08/31/2016 3:59 pm EDT

## Rapid Start feature

---

This feature ensures that **LED/CFL** lights **turn on when the dimmer preset level is low**. With this setting **enabled**, the **lights may momentarily be brighter than the preset level** (less than one second) **and then dim down to the preset level**.

**NOTE:** Depending on the type of light used, this feature may not be needed as all LED bulbs differ.

---

## Steps to enable/disable the feature:

1. Turn lights **ON**.
2. **Press and hold the on/off button for 10 seconds** until the blue dimmer LEDs **flash** for the **3 times**, then **release** the button.

This inverts the Rapid start feature. So if it was previously enabled, the it disables it, and vice versa.
