Master System Controllers and Base stations that Require a TRF-UZ1 to Communicate with: TRC-780, THZ-100, MRX-4SEN

Last Modified on 05/10/2016 11:04 am EDT

Some Total Control devices use **URC's** proprietary **URC 2.4GHz RF** to communicate to the **Master System Controller (MSC)**. Currently, the only MRX unit that has a built-in URC 2.4GHz RF transceiver is the MRX-10. This means the use of a TRF-UZ1 external RF transceiver may not be required. If using a different base station with any of the URC RF products including but not limited to:

- **TRC-780**
- **THZ-100 (URC Thermostat)**
- **MRX-4SEN (Sensor port expander)**

The **TRF-UZ1** is required when using any of the following master system controllers and the above listed URC RF devices:

- **MRX-20**
- **MRX-8**
- **CP-1**
- **CP-2**

as
