

Adding Vivido Lighting to Alarms.com/2Gig Z-Wave Panels

Last Modified on 08/01/2016 12:08 pm EDT

It is possible to use URC Vivido lighting dimmers with Alarm.com and 2Gig Z-wave alarm panels.

To use with 2GIG CP21 panel/controllers:

- assure the 2GIG/CP21 Panel/Controller is updated to **firmware v1.14** or **later**.
- Please **see** this **video** to enable Z-Wave and add devices to a 2GIG CP21 panel. [Video](#) or [CP21 Programming Manual](#)

Note: Programming our lighting is NOT possible under the Alarm.com interfaces. If adding Z-Wave devices, it must be done directly on the alarm panel.
