

Total Control Expansion Pack

Last Modified on 06/09/2021 12:26 pm EDT

Total Control offers a large variety of icons for buttons that enable installers to add a higher degree of personalization to projects through the Graphics Expansion Pack. Included in the expansion pack are graphics for small (106x64pixels) and large (120x72pixels) images for most URC interfaces. When properly installed, programmers have the flexibility to change the look of main and sub-menus within the Total Control project.

Please see the attached PDF for working with the Total Control Expansion Pack
