Graphics with a Total Control Driver

Universal Remote Control Inc. has added the ability to incorporate graphics into any custom driver.
This feature adds a greater degree of personalization that allows installers to save time by having
drivers that automatically sets a pre-selected image, saved into their personal driver repository.
The goal is to modify custom drivers to allow the application of an image to a Main Menu icon that is
displayed on all URC user interfaces.

Please see the attached PDF file for workind with graphics in Total Control Drivers
