## How To Check Your MRX-10 for Total Control 2.0 & TC 3 Compatibility

This article covers how to confirm if your MRX-10 is compatible with Total Control 2.0 & TC 3.

The **MAC Address** of the MRX-10 confirms compatibility with Total Control 2.0 & TC 3. There are two ways to locate the **MAC Address** of the unit.

1. The **MAC Address** is found on the sticker located on either the side, or back of the unit:

2. The **MAC Address** can also be found by going to **Step 6: Network Setup in Accelerator**:

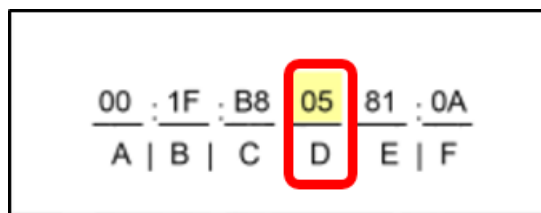

Step 6 Network Settings: URC Devices

LAN & Wifi URC Device Non URC Device

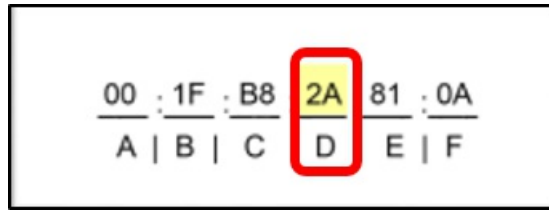

Room	Device	Mac Address	IP Address	Type
Living Room	MRX-10 Master	00:1F:B8:2A:2D:2B	192.168.0.151	Static
Living Room	TRC-1080	00:1F:B8:20:15:64	192.168.0.169	Static
Living Room	TDC-7100	00:1F:B8:31:06:C8	192.168.0.137	Static
Living Room	TRF-ZW	94:4A:0C:27:9D:58	192.168.0.180	
Living Room	SNP-2	00:1F:B8:1A:08:E5	192.168.0.178	Static
Master Be...	MRX-4IR	00:1F:B8:14:15:EE	192.168.0.159	Static
Master Be...	TRC-820	00:1F:B8:2E:06:6F	192.168.0.136	Static

Deciphering the **MAC Address**:

- MRX-10 units that are **not compatible** with Total Control 2.0/TC 3 contain **05** in location **D** of the **MAC Address**.

- Later MRX-10 units that **are compatible** with Total Control 2.0/TC3 contain **2A** in location **D** of the **MAC Address**.
