## How to Set Accelerator 3 Software to "Run As an Administrator"

This article details the steps required to change the default **Accelerator 3 properties** for your laptop or PC software installation. This will allow all automatic software updates and file imports to install properly on your computer.

Note: This articles details a Windows 10 OS installation

# How to Set Accelerator 3 Software to "Run As an Administrator"

In order for Accelerator to run properly and have all of the appropriate permissions, Accelerator needs to be run in "Administrator" mode. This can be handled a few ways - set to run one-time as an administrator or set to run permanently as an administrator. The recommended method is **Method 1.** 

### Method 1:

Run the program (always) as an administrator by <u>default</u>. If you choose this method, this setting only needs to be done one time unless the program is uninstalled and reinstalled.

Step #1. With the Accelerator 3 program CLOSED, Right-click on the Accelerator 3 program shortcut and click "Properties".

This program shortcut is normally placed on the computer desktop during installation. You can also search for the program by using the search tool.

ţc	}		
URC Accelerat		Open	
		Open file location	
	•	Run as administrator	
	6	Share with Skype	
		Troubleshoot compatibility	
		Pin to Start	
	÷	Scan with Microsoft Defender	
		Open on Mac	
		Show in Finder	
		Share on	>
		Pin to taskbar	
		Restore previous versions	
		Send to	>
		Cut	
		Сору	
		Create shortcut	
		Delete	
		Rename

Step #3. Check the box next to "Run this program as an administrator". Click on the Apply button,

# then OK.

If the computer has multiple user accounts, you can also select the "Change settings for all users" option.

After changing these settings, the UAC (user Account Control) window will be shown whenever you open the Accelerator 3 program.

Select **Yes** to proceed and enter the program.

### Method 2:

We can also choose to run the program as an administrator on a **one-time** basis. If you choose this method this must be done before each use of Accelerator.

Step #1. With the Accelerator 3 program CLOSED, Right-click on the Accelerator 3 program shortcut and select "Run as administrator".

Step #2. After selecting "Run as administrator", the UAC (user Account Control) window will be shown allowing you to open the Accelerator 3 program. Select **Yes** to proceed and enter the program.
